

Vacature

## SENIOR FULL STACK DEVELOPER

Behind The Buttons is looking for a Senior Full Stack Developer, who will help shape the various components that are necessary to build and maintain our software products.

Do you have a broad interest in all aspects of software development?  
Then please do read on!

### Responsibilities

---

Inspire and help our team with the development of our new product in a Microservices Architecture  
Prototype and develop scalable and reliable software  
Ensure maintainability by documenting code and solution  
Be an example and mentor for the junior developers on the team

### Qualifications

---

Substantial knowledge of ASP MVC 4 / C# , MySQL, MS SQL, WCF, XML, REST, HTML5, CSS3 & TypeScript.  
Experience with software architecture and micro-services  
Understanding of common software engineering practices (code documentation, continuous integration, dependency management, monitoring, version management,...)  
Good understanding of database design concepts  
Love to experiment with and explore new technologies/frameworks  
Fluent in Dutch, understanding and speaking English is a plus

### Benefits

---

Competitive salary and extra benefits  
Nice office in Ghent, 15 seconds from the highway  
Fresh fruit and the best coffee  
Young & dynamic colleagues

### Additional information

---

On a personal level we are looking for a colleague who shares our values.

**Customer Centricity:** the users of our software are the reasons for our existence. Answering their needs is what we do.

**Open minded:** We're not afraid of questioning ourselves in order to grow and evolve.

**Cooperation:** We are all part of the bigger picture and look beyond our personal interests.

**Innovative thinking:** We keep our eyes open and are on top of the newest changes in the world of technology. Our company creates space for every employee to experiment and discover new possibilities and opportunities.
